Continuation of Attachment(s) 6). Other: Examiner's Statement of Reasons for Allowance.

### **Drawings**

1. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 9/13/2000 has been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: Elrod et al. (US 5,341,155) teach the input data coordinates from the pseudo image are normalized for variations due to frequency dependence and electronic drift (see figure 3a, column 6, line 15 through column 7, line 44). Accordingly, the cited prior arts, alone or in combination, do not teach or fairly suggest "threshold setting means for setting a threshold value for the difference signal; selection means for selecting effective photoelectric conversion elements based on the respective difference signal of each element and the threshold value; and coordinate output signal generating means for outputting a coordinate output signal based on difference signals corresponding to the effective photoelectric conversion elements selected by said selection means." These distinct features have been added to independent claims and render the above limitations allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### Conclusion

3. This application is in condition for allowance except for the following formal matters:

The pre-amendment filed on 9/13/2000 has been entered with respect to the claims only. The changes to the specification have not been entered as being too numerous to physically enter these changes. Therefore, a substitute specification is required.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
